Bridge to Gold Creek, current project (2016 - 2017)

< 1-1 >

How did this project come into being?

How is the project being constructed and how much does it cost?

How is the project being funded?

Will other improvements be made in adjacent areas?

How will traffic be handled to the park and whale sculpture?

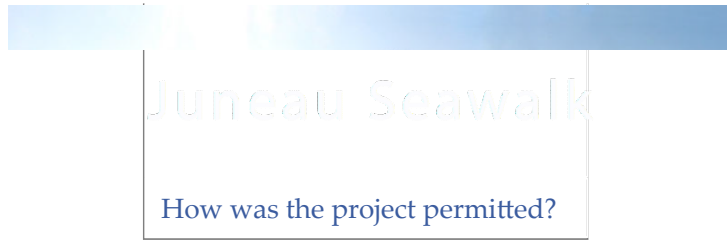

How much fill is going into the island?

How long is this segment of the seawalk?

Approximately 1000 feet of elevated deck and 350 feet of pathway across the island. The completed seawalk from the bridge to the rock dump will be about 1.8 miles.
